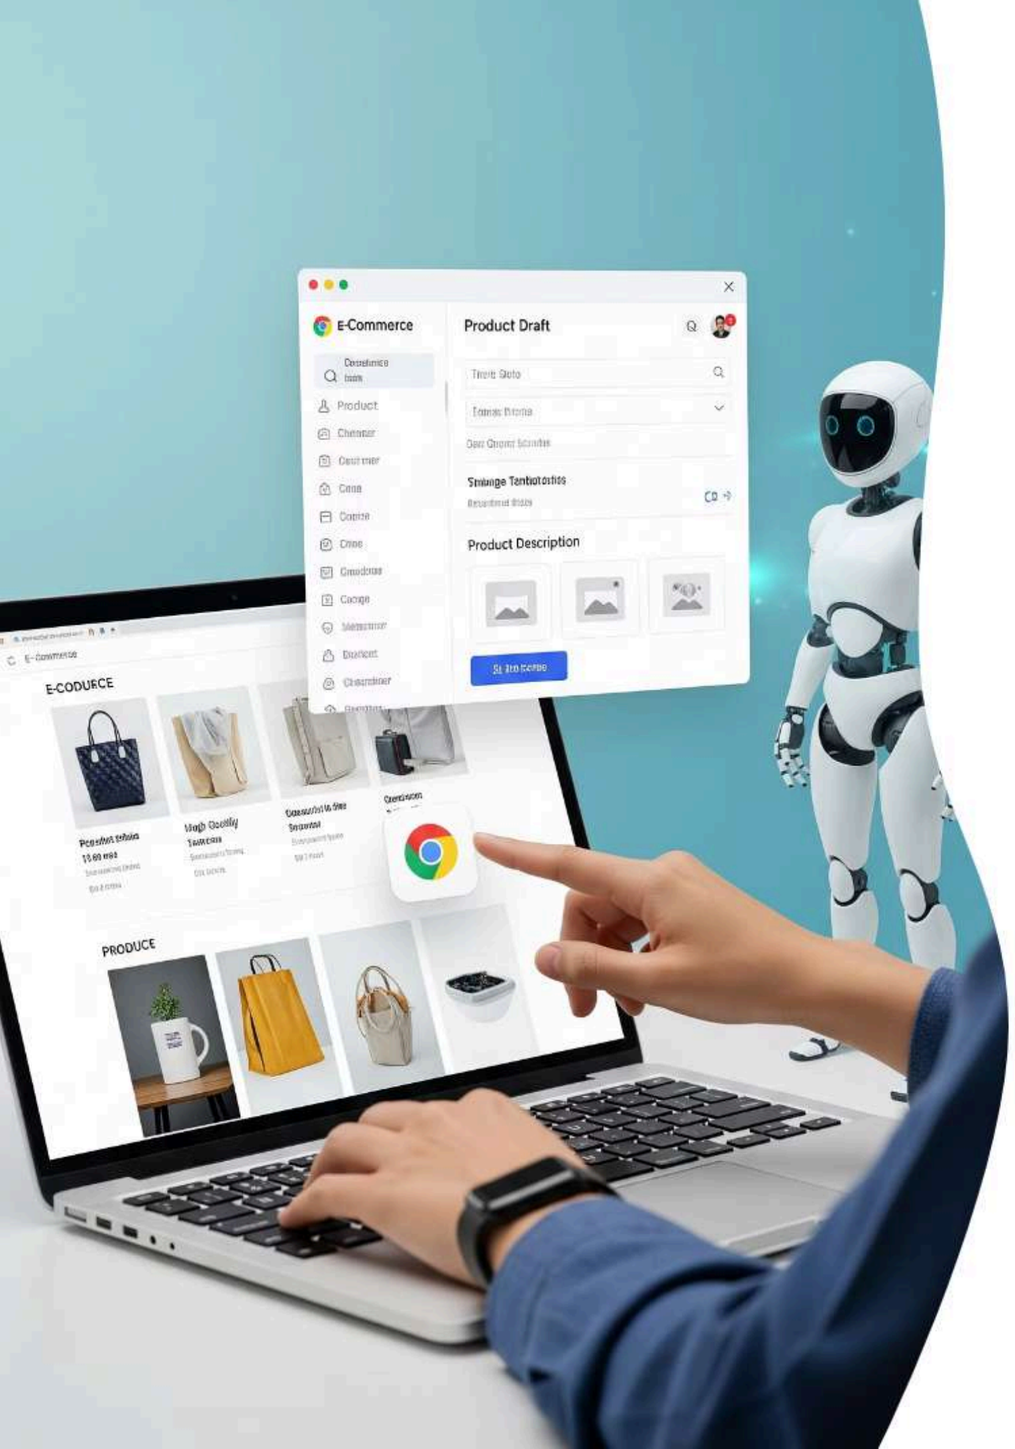
AI-Driven Product Listing Automation for Shopify

Automated Product Entry Workflow Using OpenAI + Zopoxo WMS + n8n

Product Listing AI | Ecommerce Tool | Shopify Automation

Autviz Solutions



Overview

The **Smart Product Listing Agent** is a browser-integrated automation workflow that simplifies and accelerates the process of listing products on Shopify. By scraping product data from any e-commerce website and processing it via an AI-enhanced backend, the system automatically creates clean, structured, and editable draft listings inside Zopoxo WMS, ready for publishing on Shopify.

Powered by **n8n**, **OpenAI**, and a **custom Chrome Extension**, this solution removes the manual grunt work of product creation—transforming WhatsApp messages or scraped data into fully prepared product drafts in minutes.

Challenges

Before implementing this automation, e-commerce team faced operational bottlenecks:

Manual Data Entry Pain:

Listing each product on Shopify involved copy-pasting titles, descriptions, and images—a slow, error-prone process.

Inconsistent Product Information:

Raw product details from sources like WhatsApp or third-party sites were often unstructured and lacked clarity.

Image Handling Complexity:

Downloading and uploading product images manually added further friction to the listing workflow.

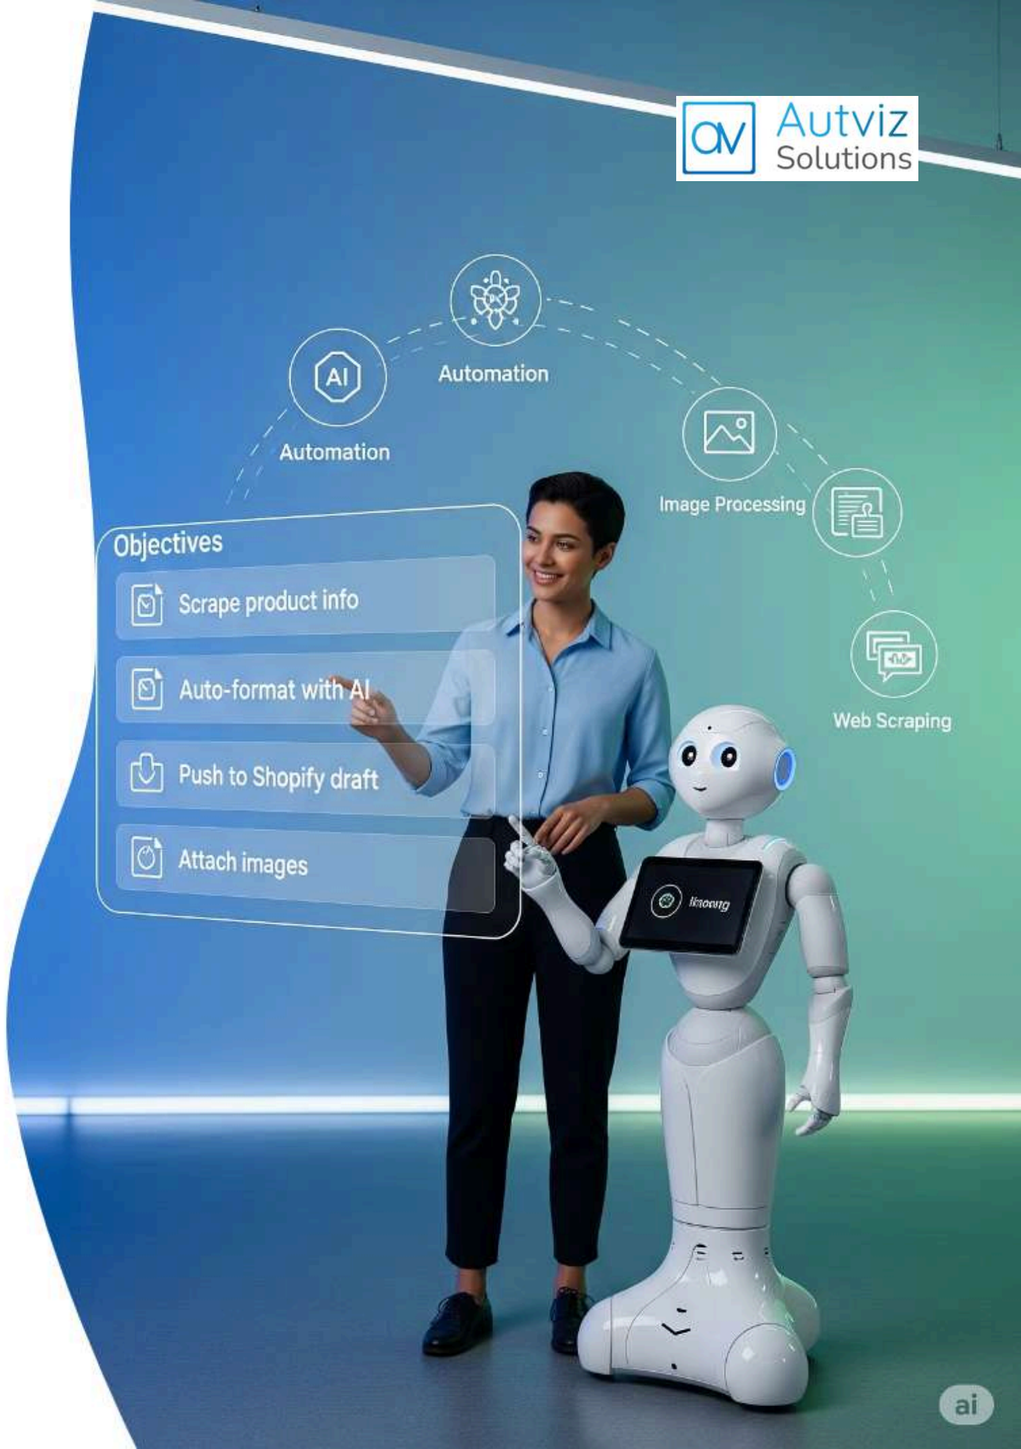
Scaling Issues:

For teams managing multiple SKUs daily, maintaining consistency and speed became difficult without automation.

Objectives

The solution aimed to:

- **Automate the end-to-end product listing** process from source to Shopify draft
- Enable **data scraping from any e-commerce site** using a Chrome Extension
- Leverage AI to structure raw product content into **titles, descriptions, and attributes**
- Download and attach **product images** automatically
- Create **review-ready product drafts** in Zopoxo WMS, synced to Shopify



Solution

Autviz Solutions

The workflow integrates browser automation, webhook-based data transmission, intelligent filtering, AI generation, and Shopify-compatible draft creation using Zopoxo WMS.

Workflow Breakdown

1. Product Data Capture:

Product information (title, description, images) is scraped from any e-commerce product page using a custom Chrome Extension.

2 Webhook Trigger:

The Chrome Extension sends this scraped data to a server via webhook trigger to n8n.

3 Payload Filtering:

Server-side filtering removes unnecessary elements and retains only essential data:

Product Title

Description

Images

Optional: Brand, Model, Pricing

4 AI Data Structuring (OpenAI Node):

OpenAI processes the raw product text to generate:

- Clean, SEO-optimized Title
- Readable, benefit-focused Description
- Structured Metadata (e.g., model, material, brand)

5 Image Handling:

Product images are downloaded and stored locally or made available for preview/download in the browser.

6 Draft Creation in Zopoxo WMS:

The structured product is then pushed to Zopoxo WMS via API in draft mode, prepped for further edits or instant publishing to Shopify.

Key Tools & Technologies

n8n

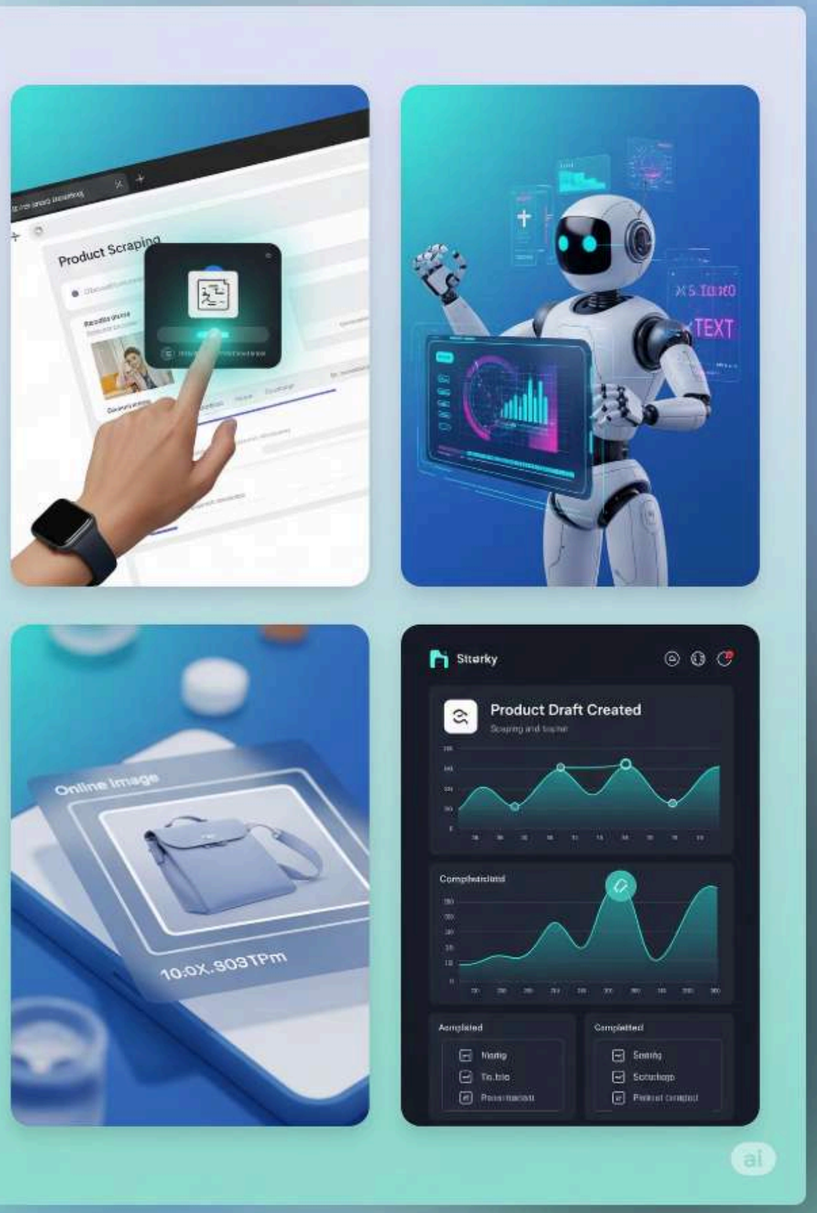
Google Chrome Extensions

OpenAI

zopoxo

Duration & Resources

- **Time Taken: 7 days**
- **Resources: 1 Automation Expert**
- **Engineering Time Saved: 12 Days**



Use Cases

Scrape to Draft in One Click:

A user visits any product page, scrapes the content via Chrome Extension, and within seconds the product appears as a draft in Zopoxo—AI-structured and image-ready.

WhatsApp to Shopify:

Vendors or suppliers send product details via WhatsApp; the automation extracts key data and formats it into draft listings.

Bulk Upload Prep:

Teams can prepare multiple Shopify-ready listings using only browser interaction—no CSV imports, no copy-paste.

AI-Assisted Copywriting:

OpenAI ensures all product titles and descriptions follow consistent tone, SEO guidance, and brand voice.

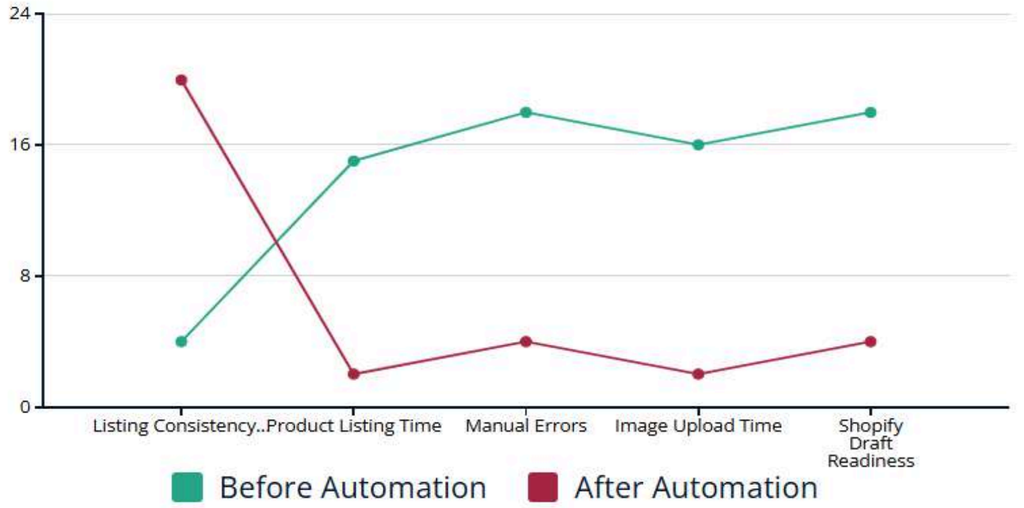
Outcomes

Metric	Before Automation	After Workflow Deployment
Time per Product Listing	~10–15 mins	<2 mins (automated)
Listing Consistency	Highly Variable	Standardized & AI-formatted
Manual Errors	Frequent	Minimal
Image Upload Time	Manual/Slow	Instant Download from Source
Shopify Draft Readiness	Manual Copy-Paste	Auto-Created via Zopoxo WMS



Conclusion

The **Smart Product Listing Agent** offers a seamless pipeline from product discovery to Shopify draft—powered by AI and browser automation. It eliminates tedious listing work, improves consistency, and dramatically accelerates time-to-market for any e-commerce business.

Whether you're managing **10 products a week or 1,000, this workflow provides a scalable solution** that turns raw product content into Shopify-ready drafts with just a few clicks.
